Wireless Communications Systems Engineer

Position Responsibilities:

- Act as conduit between various teams (DSP, S/W, HW, RF, I&T) that are contributing to projects to understand and capture design details.
- Work with customers and product leads to create system-level requirements
- Understand system-level requirements and work with various teams to ensure that designs/implementations are meeting expectations
- Derive requirements, conceptualize, define, design & prototype systems engineering solutions
- Document designs and interfaces, distribute across teams and conduct reviews and discussions.
- Understand the big picture but also break down to system-level components to capture dependencies, bottlenecks or risk areas in design.
- Travel to other G3 locations or customer sites as necessary
- May support or lead proposal efforts and new business development opportunities
- May assist in creating schedules that capture dependencies across system components and respective teams

Skills and Knowledge/Qualifications:

To be considered for this position, you must minimally meet the knowledge, skills, and abilities listed below:

- Prior experience designing or building cellular wireless communications receiver or transmitter products/systems.
- Good knowledge and understanding across various engineering principles that apply to wireless communications systems (RF, DSP, FPGA, software, digital/hardware, mechanical/packaging) and their interdependencies
- Excellent understanding of commercial cellular wireless systems (2G, 3G, 4G) how they work, interaction between mobile devices, towers and network components
- Excellent written skills using MS office (Word, Visio, Excel)
- Highly proficient in creating engineering documents: system designs, interface specifications, requirements/specifications, etc.
- Excellent verbal communications skills, ability to tailor methods of communication to communicate with a variety of very smart/talented people across the organization
- Highly motivated, able to work independently with minimal direction
- Proven track record of always striving to learn new things & understanding the big picture
- Excellent organization skills, able to manage time, tasks and priorities.

Minimum Education and Experience:

- Bachelor's degree in Electrical Engineering or Electrical Computer Engineering
- 7+ years of related experience
- Advanced degree preferred

Additional Desired Skills:

- Program management, proficient in MS project
- Familiarity with Linux
- Good understanding of commercial wireless Air Interfaces (L1, L2, L4) for 2G, 3G, 4G networks.
- Good understanding of networking and TCP/IP
- Experience using wireless test equipment (BTS Master, Spectrum Analyzer, TEMs/Nemo Drive Test, BTS Emulators)
